Austin Area 8-Hour Ozone Concentrations

2009 Ozone Season

Number of High Ozone Days (≥ 75 ppb) from 1998-2008
Austin-Round Rock MSA

If Nonattainment Monitored – Then What?

- Emphasize we gave it our best effort with Big Push
- Need to continue with existing 8-O3 Flex measures to minimize adverse health impacts of high ozone
- Carefully review and comment on EPA implementation requirements making note of:
 - Alignment of attainment dates with upwind areas
 - Need to evaluate impacts on urban area of large new point sources outside of MSA
- Maintain active involvement of local officials in control strategy selection for the region by TCEQ
